# Winterbourne Junior Girls'

## Year 6 Newsletter

### Week ending: Friday 12th June

### Fun in the sun

The girls have really been enjoying their PE over the last two weeks (cricket and rounders), and although the weather is a little cooler this week, it's still important that they're prepared for the sunshine. Please ensure that your daughter has a water bottle (water only!) as we are not currently sharing the water fountain facilities.

### This week: Design and Technology

Do you know what stem stitch is? If your daughter has been busy designing and creating her own house badge this week in D&T, maybe she can tell you about some of the stitches we've been using to bring them to life, and the colourful results. And at home pupils are crafting for their own house team.

### New routines

"When I first came to school after quarantine, I wasn't as shocked as I imagined! There are only nine desks in the classroom (all 2m apart)."

"We eat in the classroom and stay in our groups. The doors and windows are open so we can get fresh air. We follow a one-way system and have lines to show 2 metres."

"Everything was a bit confusing, but you get used to it, and I like the way things are being arranged."

Lamia and Emilia

For our **Harry Potter Writing Project** this week, we have been creating rhyming poems about the game of Quidditch. Watching the movie scenes really helped us to get a sense of the drama and fast-moving action of this sport, as well as the rivalries between the Hogwarts Houses!
