Science Enrichment Day

Girls had a fantastic time while conducting investigations and experiments during our Science Enrichment Day this week. One of the activities involved exploring one of the science's greatest mysteries: Why did the dinosaurs die out? They looked at several extinction theories and planned a debate using the arguments for and against.

In another activity, year 6 experimented with the different types of acids and alkalines by testing how they caused the colour change in different plant materials.

In the third activity, Year 6 surveyed the

playground to find out whether we have features that will attract pollinators, and discussed why pollinators are important. The girls then identified a number of pollinators, and bee-friendly plants, by researching them online. In one of the lessons, year 6 got an oppor-

tunity to construct a paper bridge to investigate its suspension, durability and stability. They used their knowledge of forces to measure the resistance of paper bridge.

Their 5th activity of the day was: investigating the Cheese making process and understanding the scientific theory behind.
