

Winterbourne Junior Girls' School

**Medical Conditions Policy
(Statutory)**

This policy is to be read in conjunction with the following policies:

- Complaints
- Equality information and objectives
- First aid
- Health and safety
- Safeguarding
- Special educational needs information report and policy
- Teaching and Learning
- Anti-bullying
- Accessibility plan

Author: M. Berkeley-Agyepong

Committee: Full Governing Body

Date Approved: 23 November 2023

Review Date: November 2024

Introduction

The Children's and Families Act 2014, from September 2014, places a duty on schools to make arrangements for children with medical conditions. Children and young people with medical conditions are entitled to a full education and have the same rights of admission to school as other children. This means that no child with a medical condition should be denied admission or prevented from taking up a place in school because arrangements for their medical condition have not been made.

Teachers and other school staff have a duty of care towards children under their supervision - measured as that of a 'reasonable parent' - and may need to take swift action in an emergency. This duty extends to teachers leading activities taking place off the school site. This could extend to a need to administer medicine.

This policy meets the requirements under [Section 100 of the Children and Families Act 2014](#), which places a duty on governing boards to make arrangements for supporting pupils at their school with medical conditions.

It is also based on the Department for Education's statutory guidance: [Supporting pupils at school with medical conditions](#).

Statement of intent

Winterbourne Junior Girls' School is an inclusive community that aims to support and welcome pupils with medical conditions.

- A. Winterbourne Junior Girls' School understands that it has a responsibility to make the school welcoming and supportive to pupils with medical conditions who currently attend and to those who may enrol in the future.
- B. Winterbourne Junior Girls' School aims to provide children with medical conditions the same opportunities as others at school.
- C. Pupils with medical conditions are encouraged to take control of their condition.
- D. Winterbourne Junior Girls' School aims to include all pupils with medical conditions in all school activities.
- E. Parents/carers of pupils with medical conditions are aware of the care their children receive in Winterbourne Junior Girls' School.
- F. The school ensures all staff understand their duty of care to children and young people in the event of an emergency.
- G. All staff have access to information about what to do in an emergency.
- H. Winterbourne Junior Girls' School understands that certain medical conditions are serious and can be potentially life-threatening, particularly if ill managed or misunderstood.
- I. All staff have an understanding of the common medical conditions that may affect children at Winterbourne Junior Girls' School. Staff receive annual updates. The Headteacher is responsible for ensuring staff receive annual updates. The School Nursing Service can provide the updates if the school requests.
- J. The medical conditions policy is understood and followed by the whole school.

Entitlement/Equal Opportunities

The school accepts that pupils with medical needs should be assisted if at all possible and that they have a right to the full education available to other pupils.

The school believes that pupils with medical needs should be enabled to have full attendance and receive necessary proper care and support.

The school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely on school trips, visits and sporting activities.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, pupils, their parents and any relevant healthcare professionals will be consulted.

The school accepts that all employees have rights in relation to supporting pupils with medical needs as follows:-

- choose whether or not they are prepared to be involved
- receive appropriate training
- work to clear guidelines
- have concerns about legal liability
- bring to the attention of management any concern or matter relating to supporting pupils with medical needs
- Insurance arrangements, which cover staff providing support to pupils with medical conditions

Procedures to be followed whenever the school is notified that a pupil has a medical condition

Form sent out by school asking parents to identify any medical conditions including: <ul style="list-style-type: none">● Transition discussions● At start of school year● New enrolment (during the school year)● New diagnosis informed by parents	school
School collates response and identifies those needing individual health plans and sends to school nurse.	school
School Nurse writes to parents either to review Individual Health Plan (IHP) or start new plan if needed.	School/nurse
Parents complete IHP with relevant member of school staff, if required – send to school nurse.	Parents/school
School nurse reviews the IHP, contacts parents if necessary and discusses with school designated person. Stored in school according to policy	School and nurse
The finalised plan is given to the parents/carers, school and school nurse.	

Individual healthcare plans

The role of individual healthcare plans, and who is responsible for their development, in supporting pupils with medical conditions

The headteacher has overall responsibility for the development of IHPs for pupils with medical conditions. This has been delegated to **Mrs Louise Watts and Miss Natasha Sholay**.

Winterbourne Junior Girls' School uses an Individual Health Plan for children with complex health needs to record important details about the individual children's medical needs at school, their triggers, signs, symptoms, medication and other treatments. Further documentation can be attached to the Individual Health Plan if required.

Individual Health Plans are used to create a centralised register of pupils with complex health needs. An identified member of school staff has responsibility for the register at Winterbourne Junior Girls' School. There is a clear and accessible system for identifying pupils with health plans/medical as names are 'flagged' on the SIMs system. A robust procedure is in place to ensure that the child's record, contact details and any changes to the administration of medicines, condition, treatment or incidents of ill health in the school are updated on the schools record system.

Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed.

Plans will be developed with the pupil's best interests in mind and will set out:

- What needs to be done
- When
- By whom

Parents/carers are regularly reminded to update their child's Individual Health Plan if their child has a medical emergency or if there have been changes to their symptoms (getting better or worse), or their medication and treatments change. Each Individual Health Plan will have a review date. Parents/carers will have a designated route/person to direct any additional information, letters or health guidance to in order that the necessary records are altered quickly and the necessary information disseminated.

Not all pupils with a medical condition will require an IHP. It will be agreed with a healthcare professional and the parents when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is not a consensus, the headteacher will make the final decision.

Plans will be drawn up in partnership with the school, parents and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate.

IHPs will be linked to, or become part of, any statement of special educational needs (SEN) or education, health and care (EHC) plan. If a pupil has SEN but does not have a statement or EHC plan, the SEN will be mentioned in the IHP.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed.

N.B. Pupils with medical conditions requiring an Individual Health Plan are: those who have diabetes, epilepsy with rescue medication, anaphylaxis, severe asthma that has required a hospital admission within the last 12 months. There may be other children with unusual chronic conditions who need a care plan, please liaise with the school nurse about them.

How staff will be supported in carrying out their role to support pupils with medical conditions and how this will be reviewed

- Relevant staff at Winterbourne Junior Girls' School are aware of the most common serious medical conditions at Winterbourne Junior Girls' School.
- Staff at Winterbourne Junior Girls' School understand their duty of care to pupils both during, and at either side of the school day in the event of an emergency. In an emergency situation school staff are required under common law duty of care to act like any reasonably prudent parent/carer. This may include administering medication.
- Staff receive updates at least once a year (as planned by school nursing service) and know how to act in an emergency. Additional training is prioritised for key staff members who work with children who have specific medical conditions supported by an Individual Health Plan.
- The action required for staff to take in an emergency for the common serious conditions at Winterbourne Junior Girls' School is displayed in prominent locations for all staff including classrooms, kitchens, school staff room, and electronically.
- Winterbourne Junior Girls' School uses Individual Health Plans to inform the appropriate staff (including supply teachers and support staff) of pupils with complex health needs in their care who may need emergency help.
- Winterbourne Junior Girls' School has procedures in place so that a copy of the pupil's Individual Health Plan is sent to the emergency care setting with the pupil. On occasions when this is not possible, the form is sent (or the information on it is communicated) to the hospital as soon as possible.
- If a pupil needs to be taken to hospital, a member of staff will always accompany them and will stay with them until a parent arrives. Winterbourne Junior Girls' School will try to ensure that the staff member will be one the pupil knows.

Roles and Responsibilities

The governing body must ensure that arrangements are in place to support pupils with medical conditions. In doing so they should ensure that such children can access and enjoy the same opportunities at school as any other child.

Governors

Have a responsibility to:

- ensure the health and safety of their staff and anyone else on the premises or taking part in school activities (this includes all pupils). This responsibility extends to those staff and others leading activities taking place off-site, such as visits, outings or field trips.
- ensure the schools health and safety policies and risk assessments are inclusive of the needs of pupils with medical conditions and reviewed annually.

- make sure the medical conditions policy is effectively implemented, monitored and evaluated and regularly updated.
- ensure that the school has robust systems for dealing with medical emergencies and critical incidents, at any time when pupils are on site or on out of school activities.

Headteacher

Has a responsibility to:

- ensure the school is inclusive and welcoming and that the medical conditions policy is in line with local and national guidance and policy frameworks.
- ensure the policy is put into action, with good communication of the policy to all staff, parents/carers and governors.
- ensure every aspect of the policy is maintained.
- ensure that if the oversight of the policy is delegated to another senior member of staff that the reporting process forms part of their regular supervision/reporting meetings.
- monitor and review the policy at regular intervals, with input from governors, parents/carers, staff and external stakeholders.
- report back to governors about implementation of the medical conditions policy.
- ensure through consultation with the governors that the policy is adopted and put into action.

All School Staff

Have the responsibility to:

- be aware of the potential triggers, signs and symptoms of common medical conditions and know what to do in an emergency.
- call an ambulance in an emergency.
- understand the school's medical conditions policy.
- know which pupils in their care have a complex health need and be familiar with the content of the pupil's Individual Health Plan.
- know the schools registered first aiders and where assistance can be sought in the event of a medical emergency.
- know the members of the schools Critical Incident Team if there is a need to seek assistance in the event of an emergency.
- maintain effective communication with parents/carers including informing them if their child has been unwell at school.
- ensure pupils who need medication have it when they go on a school visit or out of the classroom.
- be aware of pupils with medical conditions who may be experiencing bullying or need extra social support.
- understand the common medical conditions and the impact these can have on pupils.
- ensure that all pupils with medical conditions are not excluded unnecessarily from activities they wish to take part in.
- ensure that pupils have the appropriate medication or food during any exercise and are allowed to take it when needed.
- follow universal hygiene procedures if handling body fluids.
- ensure that pupils who present as unwell should be questioned about the nature of their illness, if anything in their medical history has contributed to their current feeling of being

unwell, if they have felt unwell at any other point in the day, if they have an Individual Health Plan and if they have any medication. The member of staff must remember that while they can involve the pupil in discussions regarding their condition, they have a duty of care and as such must be assured or seek further advice from a registered first aider if they are in doubt as to the child's health, rather than take the child's word that they feel better.

Teaching Staff

Have an additional responsibility to also:

- ensure pupils who have been unwell have the opportunity to catch up on missed school work.
- be aware that medical conditions can affect a pupil's learning and provide extra help when pupils need it, in liaison with the SENCO.
- liaise with parents/carers, special educational needs coordinator and welfare officers if a child is falling behind with their work because of their condition.
- use opportunities such as PSHE and other areas of the curriculum to raise pupil awareness about medical conditions.

School Nurse or Healthcare Professional

Has a responsibility to:

- help provide regular updates for school staff in managing the most common medical conditions at school at the schools request.
- provide information about where the school can access other specialist training.
- update the Individual Health Plans in liaison with appropriate school staff and parents/carers.

First Aiders

Have an additional responsibility to:

- give immediate, appropriate help to casualties with injuries or illnesses.
- when necessary ensure that an ambulance is called.
- ensure they are trained in their role as first aider.
- it is recommended that first aiders are trained in paediatric first aid.

Inclusion/Special Educational Needs Coordinators

Have the additional responsibility to:

- ensure teachers make the necessary arrangements if a pupil needs special consideration or access arrangements in exams or class work.
- know which pupils have a medical condition and which have special educational needs because of their condition.
- ensure all pupils with medical conditions are not excluded unnecessarily from activities they wish to take part in.

Pupils

Have a responsibility to:

- treat other pupils with and without a medical condition equally.
- tell their parents/carers, teacher or nearest staff member when they are not feeling well.
- let a member of staff know if another pupil is feeling unwell.

- treat all medication with respect.
- know how to gain access to their medication in an emergency.
- ensure a member of staff is called in an emergency situation.

Parents/Carers

Have a responsibility to:

- tell the school if their child has a medical condition or complex health need.
- ensure the school has a complete and up-to-date Individual Health Plan if their child has a complex health need.
- inform the school about the medication their child requires during school hours.
- inform the school/provider of any medication their child requires while taking part in visits, outings or field trips and other out-of-school activities.
- tell the school about any changes to their child's medication, what they take, when, and how much.
- Inform the school of any changes to their child's condition.
- ensure their child's medication and medical devices are labelled with their child's full name.
- ensure that the school has full emergency contact details for them.
- provide the school with appropriate spare medication labelled with their child's name.
- ensure that their child's medication is within expiry dates.
- keep their child at home if they are not well enough to attend school.
- ensure their child catches up on any school work they have missed.
- ensure their child has regular reviews about their condition with their doctor or specialist healthcare professional.
- if the child has complex health needs, ensure their child has a written Individual Health Plan for school and if necessary a management plan from their doctor or specialist healthcare professional to help their child manage their condition.
- have completed/signed all relevant documentation including the Individual Health Plan if appropriate

First Aid

We have a number of school staff who are trained 'first-aiders' and in the event of illness or accident will provide appropriate first aid. In the event of a more serious accident, we will contact the parent/carer as soon as possible. If hospital treatment is required and a parent/carer is not available, if travelling by a staff member's car or taxi, 2 members of staff will take the child to hospital and stay with the child until the parent/carer arrives. If the child is required to travel in an ambulance a member of staff will accompany the child in the ambulance if their parent/carer is unavailable.

We will inform parent/carers, using a standard letter if their child has had an accident after a bang to the head and received first aid attention.

Administration of Medicines

The Headteacher will accept responsibility for members of school staff giving or supervising children taking prescribed medication during the school day where those members of staff have volunteered to do so and have agreed to adhere to this policy.

Where there is concern about whether the school can meet a child's needs the Headteacher should seek advice from the school nurse or doctor, the child's GP or other medical adviser. Each

item of prescribed medication must be delivered in its original, pharmacy labelled container and handed directly to the school office or person authorised by the Headteacher.

Managing medicines

Prescription and non-prescription medicines will only be administered at school:

- When it would be detrimental to the pupil's health or school attendance not to do so
and
- Where we have parents' written consent
- Where an Administration of Medicines Consent Form with clear instructions as to administration is completed

The only exception to this is where the medicine has been prescribed to the pupil without the knowledge of the parents.

Pupils under 16 will not be given medicine containing aspirin unless prescribed by a doctor. Anyone giving a pupil any medication (for example, for pain relief) will first check maximum dosages and when the previous dosage was taken. Parents will always be informed.

The school will only accept prescribed medicines that are:

- In-date
- Labelled
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage

The school will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

All medicines will be stored safely. Pupils will be informed about where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to pupils and not locked away.

Medicines will be returned to parents to arrange for safe disposal when no longer required.

Controlled drugs

[Controlled drugs](#) are prescription medicines that are controlled under the [Misuse of Drugs Regulations 2001](#) and subsequent amendments, such as morphine or methadone.

A pupil who has been prescribed a controlled drug may have it in their possession if they are competent to do so, but they must not pass it to another pupil to use. All other controlled drugs are kept in a secure cupboard in the school office and only named staff have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept.

Pupils managing their own needs

Pupils who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be discussed with parents and it will be reflected in their IHPs.

Pupils will be allowed to carry their own medicines and relevant devices wherever possible. Staff will not force a pupil to take a medicine or carry out a necessary procedure if they refuse, but will follow the procedure agreed in the IHP and inform parents so that an alternative option can be considered, if necessary.

Unacceptable practice

School staff should use their discretion and judge each case individually with reference to the pupil's IHP, but it is generally not acceptable to:

- Prevent pupils from easily accessing their inhalers and medication, and administering their medication when and where necessary
- Assume that every pupil with the same condition requires the same treatment
- Ignore the views of the pupil or their parents
- Ignore medical evidence or opinion (although this may be challenged)
- Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHPs
- If the pupil becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable
- Penalise pupils for their attendance record if their absences are related to their medical condition, e.g. hospital appointments
- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively
- Require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their pupil, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs
- Prevent pupils from participating, or create unnecessary barriers to pupils participating in any aspect of school life, including school trips, e.g. by requiring parents to accompany their child
- Administer, or ask pupils to administer, medicine in school toilets

Staff who volunteer to assist in the administration of medication must receive appropriate training/guidance identified by the Headteacher in liaison with health professionals. The Headteacher or representative will seek the advice of healthcare professionals on the type of training required for each authorised member of staff and what types of medication that training covers. Unless otherwise indicated on the storage instructions, all medication to be administered will be kept in a safe place in the medicine cabinet.

The school member of staff administering the medication must record details of each occasion when medicine is administered to a child.

If children refuse to take medication, the staff should not force them to do so. The school should inform the child's parent/carer as a matter of urgency, and may need to call the emergency services.

Parent/carers will be advised that it is their responsibility to notify the school of any changes to a child's medication. Parents/carers should also inform the school of any other circumstances that may affect the administration of medication or of the child's reaction to the medication.

Accident reporting

Details of minor accidents/incidents are recorded in the Accident Book together with any treatment provided. Accidents of a serious nature are reported using the on-line reporting system to the HSE under RIDDOR.

Physical Activity

We recognise that most children with medical needs can participate in physical activities and extra-curricular sport. Any restrictions in a child's ability to participate in PE or specific physical activities should be recorded in their IHCP. All staff should be aware of issues of privacy and dignity for children with particular needs.

School Visits

When preparing risk assessments staff will consider any reasonable adjustments they might make to enable a child with medical needs to participate fully and safely on visits. Sometimes additional safety measures may need to be taken for outside visits and it may be that an additional staff member, a parent/carer or other volunteer might be needed to accompany a particular child. Arrangements for taking any medicines will need to be planned or as part of the risk assessment and visit planning process. A copy of IHCP should be taken on trips and visits in the event of information being needed in an emergency.

Residential Visits

Parent/carers of children participating in residential visits will need to complete a consent form giving details of all medical/dietary needs. Administration of medicine forms need to be completed prior to the day of departure and all medication which needs to be administered during the course of the visit should be handed directly to the group leader before leaving the school at the start of the visit.

Staff training

The school is responsible for ensuring that staff have appropriate training to support children with medical needs. Specific training and staff awareness sessions are held for children with highly individual needs prior to the child joining the school. Arrangements are made with appropriate agencies e.g. School Health to update staff training on a regular basis.

Confidentiality

Staff must always treat medical information confidentially. Agreement should be reached between parent/carers and the school about whom else should have access to records and other information about a child and this will be detailed in their Individual Healthcare Plan. If information is withheld from staff, they will not generally be held responsible if they act incorrectly in giving medical assistance but otherwise in good faith.

Other agencies

The school nurse, paediatrician or other specialist bodies may be able to provide additional background information for school staff. Any requests or referral to these services will only be made with parental consent.

Record keeping

The governing board will ensure that written records are kept of all medicine administered to pupils. Parents will be informed if their pupil has been unwell at school. IHPs are kept in a readily accessible place which all staff are aware of.

Liability and indemnity

The governing board will ensure that the appropriate level of insurance is in place and appropriately reflects the school's level of risk.

The details of the school's insurance policy are: **RPA, Public and Employers liability insurance number 101745**

Complaints

Parents with a complaint about their child's medical condition should discuss these directly with the headteacher in the first instance. If the headteacher cannot resolve the matter, they will direct parents to the school's complaints procedure.

Monitoring and evaluation

Staff and governors, on a three yearly basis, will review this policy unless circumstances demand an earlier review.

We have carefully considered and analysed the impact of this policy on equality and the possible implications for pupils with protected characteristics, as part of our commitment to meet the Public Sector Equality Duty (PSED) requirement to have due regard to the need to eliminate discrimination, advance equality of opportunity and foster good relations.

Housekeeping

At the beginning of each term, and when new medication is received, a central record should be kept listing any medication that a pupil needs to use whilst in school. This record should include when the medication was received by the school, the expiry date and when the parent /carer requires contacting for said medication to be renewed/replaced.

Appendix 2

Medical Conditions that Require an IHCP

Pupils with medical conditions requiring an Individual Health Plan are: those who have diabetes, epilepsy with rescue medication, anaphylaxis, severe asthma that has required a hospital admission within the last 12 months. There may be other children with unusual chronic conditions who need a care plan, please liaise with the school nurse about them.

Anaphylaxis

Anaphylaxis can be triggered by foods (nuts, shellfish, dairy products) or non foods (wasp and bee stings, certain medicines, even exercise). The symptoms of anaphylaxis can be identified by effects on the respiratory system, cardiovascular system, gastrointestinal system, skin, nervous system and genitourinary system. In the event of an attack it is important to administer an epipen as soon as possible and then call 999 for an ambulance

Photographs of all children needing an epipen can be found on Staff room and Office notice boards and in the classrooms of individual children. Children's Individual Health Care Plans are kept in classrooms copies are also stored centrally in the Medical File in the office and in individual children's files.

There will be annual training sessions for all staff.

Epipens are stored in the school office and in the child's classroom. The Welfare Assistant is responsible for monitoring the expiry date of the epipen and advising parents.

Asthma

All children have to be in charge of their own pump. Pumps need to be clearly labelled and stored in an accessible place in the classroom in the First Aid bag. If a child has to use their pump, then this will need to be recorded in the medical book in the main office with an adult.

If a child is having an asthma attack, then another person will need to go and collect their inhaler. All inhalers need to be taken on trips.

Diabetes

We recognise that Diabetes should not be taken lightly because it is a very serious condition, and could result in a Hypoglycaemia attack (Hypo) where blood sugar level become too low, or a Hyperglycaemia attack (Hyper) where blood sugar levels become too high. Prompt medical attention will then be required to rectify the chemical and sugar imbalance in the blood. Children who are diabetic need supervision and careful monitoring so that staff are aware of any changes in the child and are able to take immediate action if they should need to. All children with Diabetes in school will have their own IHCP. Each child with diabetes will have an emergency box

labelled with their name and photograph and containing any relevant equipment required to control a hypo or hyper attack.

Epilepsy

a neurological disorder marked by sudden recurrent episodes of sensory disturbance, loss of consciousness, or convulsions, associated with abnormal electrical activity in the brain.

IN THE EVENT OF A CHILD HAVING AN EPILEPTIC SEIZURE

- Stay calm
- If the child is convulsing then put something soft under their head
- Protect the child from injury (remove harmful objects from nearby)
- NEVER try and put anything in their mouth or between their teeth
- Try and time how long the seizure lasts – if it lasts longer than usual for that child or continues for more than five minutes then call medical assistance
- When the child finishes their seizure stay with them and reassure them
- Do not give them food or drink until they have fully recovered from the seizure

Appendix 3

School visit checklist

These items are to be taken on all school trips/visits.

- Green First Aid bag – please check the contents of the bag against the checklist in the bag.
- Asthma inhalers - check the canister inside the inhaler as well as the box, this is essential to ensure that the inhaler is in date.
- School Calpol and Piriton
- The spare inhaler and spacer
- Spare underwear and sanitary wear

Template E: contacting emergency services

Request an ambulance - dial 999, ask for an ambulance and be ready with the information below.

Speak clearly and slowly and be ready to repeat information if asked.

1. your telephone number
2. your name
3. your location as follows Winterbourne Junior Girls' School. Winterbourne Road. Thornton Heath. CR7 7QT. Enter through main vehicle gates.
4. state what the postcode is – please note that postcodes for satellite navigation systems may differ from the postal code
5. provide the exact location of the patient within the school setting
6. provide the name of the child and a brief description of their symptoms
7. inform Ambulance Control of the best entrance to use and state that the crew will be met and taken to the patient
8. put a completed copy of this form by the phone

Template F: model letter inviting parents to contribute to individual healthcare plan development

Dear Parent

DEVELOPING AN INDIVIDUAL HEALTHCARE PLAN FOR YOUR CHILD

Thank you for informing us of your child's medical condition. I enclose a copy of the school's policy for supporting pupils at school with medical conditions for your information.

A central requirement of the policy is for an individual healthcare plan to be prepared, setting out what support the each pupil needs and how this will be provided. Individual healthcare plans are developed in partnership between the school, parents, pupils, and the relevant healthcare professional who can advise on your child's case. The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when and by whom. Although individual healthcare plans are likely to be helpful in the majority of cases, it is possible that not all children will require one. We will need to make judgements about how your child's medical condition impacts on their ability to participate fully in school life, and the level of detail within plans will depend on the complexity of their condition and the degree of support needed.

A meeting to start the process of developing your child's individual health care plan has been scheduled for xx/xx/xx. I hope that this is convenient for you and would be grateful if you could confirm whether you are able to attend. The meeting will involve [the following people]. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist and provide any other evidence you would like us to consider at the meeting as soon as possible.

If you are unable to attend, it would be helpful if you could complete the attached individual healthcare plan template and return it, together with any relevant evidence, for consideration at the meeting. I [or another member of staff involved in plan development or pupil support] would be happy for you contact me [them] by email or to speak by phone if this would be helpful.

Yours sincerely
